ecobee | SmartBuildings

Thermostat management software that delivers savings and comfort.

Increase control across all your locations to improve your bottom line and enhance customer comfort.

Save on energy and operational costs.

- Increase energy savings across all locations. Use SmartBuildings to set standard temperature settings and schedule changes remotely.

- Use reliable runtime data from reports to gain visibility into issues, avoiding unnecessary truck rolls.

Enhance occupant comfort.

- Maintain optimal customer comfort by receiving alerts when temperature gets too high or low.

- Use passcodes to allow employees to make limited changes at the thermostat level.

Get control and visibility from anywhere.

- Empower your remote maintenance teams with multi-user access and permissions.

- Make global changes to thermostats remotely using SmartBuildings and its mobile app.

Extend the lifespan of your assets.

- Wired-in sensors prevent damage to sensitive inventory, including products in freezers.

- Get performance alerts to keep you one step ahead of equipment failures.
