

Totaline® Remanufactured Compressors

3 things you should know about Totaline® remanufactured compressors:

1. They're competitively priced.
2. They're offered by the people who designed and manufactured them.
3. They're competitively priced.

If you're tired of settling for low-quality rebuilt compressors just because they cost less, there's something you should know.

With the new line of Totaline remanufactured compressors, you can get a standard efficiency air conditioning compressor at a very competitive price.

Totaline Series Remanufactured Compressors are offered by the very same people who designed and manufactured them in the first place, Carrier. That means every Totaline Compressor has the backing of more than 75 years of manufacturing experience — so you can count on Totaline remanufactured compressors to be the best value in the business.

Now you can get all the quality and warranty assurance of a reman with our Totaline compressor series, which offers standard efficiencies and all the features you need.

To put it simply: if you're looking for a remanufactured compressor at a competitive price with a no-hassle warranty, look no further than Totaline.

Total Reliability... at a Totally Competitive Price.

When you need a reliable standard efficiency compressor at a competitive price, turn to Totaline.
